

Andy Chokbengboun

Integration Developer | EDI • Managed File Transfer (MFT) • PowerShell • Windows Server • Azure DevOps

Cypress, TX | 479-221-3818 | achokbengboun@gmail.com

PROFESSIONAL SUMMARY

Integration Developer with 3+ years of experience supporting EDI and Managed File Transfer (MFT) environments in the transportation and logistics industry. Experienced with CLEO Clarify, Business Process development, file mapping, AS2, SFTP, FTP, PowerShell automation, SQL, Windows Server administration, production support, and Agile/SCRUM delivery using Azure DevOps. Proven ability to reduce EDI outage times, automate monitoring, improve system reliability, and accelerate incident response through process improvements and scripting.

CORE COMPETENCIES

- CLEO Clarify
- CLEO Business Processes (BPS)
- CLEO File Mapping
- ANSI X12 EDI
- AS2 / SFTP / FTP
- PowerShell Automation
- Windows Server
- SQL Server
- ECS Management Console
- TMW Systems
- ServiceNow
- Microsoft 365
- Azure DevOps
- Agile / SCRUM

EDUCATION

University of Arkansas – Fort Smith
Bachelor of Science, Information Technology
Programming Emphasis • May 2023

PROFESSIONAL EXPERIENCE

USA Truck — Integration Developer

August 2025 – Present

- Develop and support enterprise EDI and Managed File Transfer integrations supporting transportation and logistics operations.
- Design and maintain CLEO Business Processes (BPS) and file mappings for automated workflows.
- Configure secure AS2, SFTP, and FTP connections for new and existing trading partners.
- Developed PowerShell automation and Windows Task Scheduler solutions to monitor services, detect stalled files, automate archive cleanup, and send proactive email notifications—significantly reducing EDI outage duration and improving response time.
- Led migration of TMW and CLEO integration paths to a new enterprise file server with minimal production disruption.
- Troubleshoot production EDI issues following the company's separation from its parent organization.
- Participate in Agile/SCRUM ceremonies using Azure DevOps while supporting implementation of the Volvo Autonomous Solutions EDI integration.

DB Schenker — EDI Coordinator II (Remote)

August 2022 – August 2025

- Supported enterprise EDI production environments and mission-critical file transfers.
- Configured AS2, FTP, and SFTP connectivity, onboarded trading partners, and resolved integration issues.
- Authored technical specifications and collaborated with internal teams to improve integration reliability.

USA Truck — HR People Team Intern

June 2022 – August 2022

- Supported HR operations, documentation, reporting, and employee onboarding initiatives.

SELECTED ACHIEVEMENTS

- Reduced EDI outage times by automating monitoring and alerting with PowerShell.
- Improved incident response through proactive stalled-file detection.
- Automated archive folder cleanup to reclaim server storage and reduce manual maintenance.
- Successfully onboarded multiple trading partners using secure AS2 and SFTP connectivity.
